

TauRIS Pooling Procedures

Prior to setting your clock for shipping of the birds you are able to pool your birds.

On your Clock

1. Attach sensor cable to clock.
2. Attach power supply to clock
3. Press Start
4. Press 7 Pooling
5. This will bring up the Main Pooling Screen
6. Press #
7. Select the bird (first line on your clock display)
8. Press # to select the bird
9. Press # to place an "X" or a 0 in the column of your choice. This will advance you to the next column.
10. Press 0 to advance to the column of your choice
11. Press # when you are finished to accept your nomination choice
12. Repeat steps 8 thru 12 until you are completed with nominating

Your clock is now ready for entering your race data. The pooling information will be transferred to the WinSpeed entry sheet so that you will have a record of how you pooled your birds. When the race is knocked off the race result printout will show every flier's pooled birds in the order that they clocked.
